INSPIRING INNOVATIONS

Our team for field installation has been given a boost!

Small, agile and particularly sought after when things are getting a bit tight again: Our new player, FIELDLINE MODULAR M8, networks sensors and actuators in the field even under extremely adverse installation conditions. He works in the direct proximity of the process and his compact design makes for space-saving machines and plants. As a fast, flexible and reliable component, FIELDLINE MODULAR M8 blends in seamlessly with our unbeatable field installation team and makes it all the more successful. Convince yourself!

Our strategy for your success:

Speed

Our products and solutions are designed to save you time and therefore money in crucial situations.

- During planning – With our powerful configuration software FIELD Select
- During installation – With our innovative fast connection systems SPEEDCON, QUICKON and PIERCECON
- During startup – With convenient addressing of our modules
- During diagnostics – With signaling of module statuses and their exact location

Flexibility

Our wide choice of products and services allows you to act flexibly during the planning, expansion or conversion of your system.

- Universal components for M5, M8, M12, M16 and M23
- Passive sensor/actuator cabling or fieldbus components from the FIELDLINE family of products
- Fieldbus components to choose from INTERBUS, PROFIBUS, DeviceNet and CanOpen
- Preassembled conductors put together individually to suit your requirements

Reliability

Our products are tested and certified, thus guaranteeing high reliability of your machines and systems.

- IP protection IP65/IP67 in acc. with EN 60529
- Coding in acc. with IEC 60947-2
- Pin assignment, requirements and testing in acc. with IEC 61076-2-101
- Vibration and shock resistance in acc. with IEC 60512-4, EN 60068-2-6 and EN 60068-2-27
- Fieldbus components certified by INTERBUS Club, PNO, ODVA, CAN in automation
