

Safety Technology Basics

Order No. 2850821

One-day seminar
Basics of machine safety

1 Description

This seminar will provide you with a comprehensive overview of the essential requirements regarding machine safety for the manufacture and operation of machinery. You will know why safety technology is absolutely necessary and contributes significantly to accident prevention. You will become familiar with the methods and processes for achieving machine safety. You will gain an overview of the safety standards, relevant laws, directives, and ordinances for manufacturers and operators of machinery.

2 Program

- Basic information regarding machine safety for manufacturers and operators
- Directives, ordinances, and laws regarding machine safety
- Structure of standards and current standard situation regarding machine safety
- Functional safety management
- Risk assessment
- Preventing the manipulation of safety equipment
- Significant changes to machinery
- Interlinking/assembly of machinery
- Sale/purchase of machinery
- Interface between machine operators/machine manufacturers
- Interface between machine manufacturers/control cabinet manufacturing
- Handling used machinery

3 Target groups

- Planners, planning engineers
- Servicing and maintenance personnel
- Startup engineers
- Decision makers
- Buyers

4 Duration, date, and costs

1 day

We will be happy to prepare a non-binding quote for you.

To request this, speak to your personal sales partner directly or contact the headquarters in your country.

5 Requirements

None
