

MARKING system

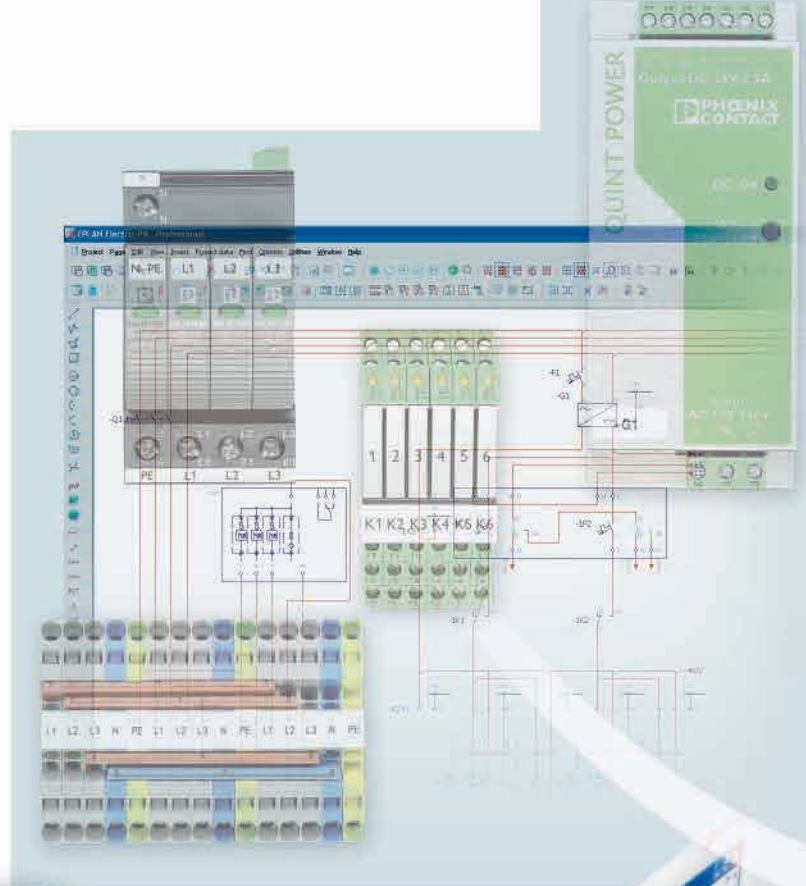

CLIP PROJECT advanced

Planning and marking software

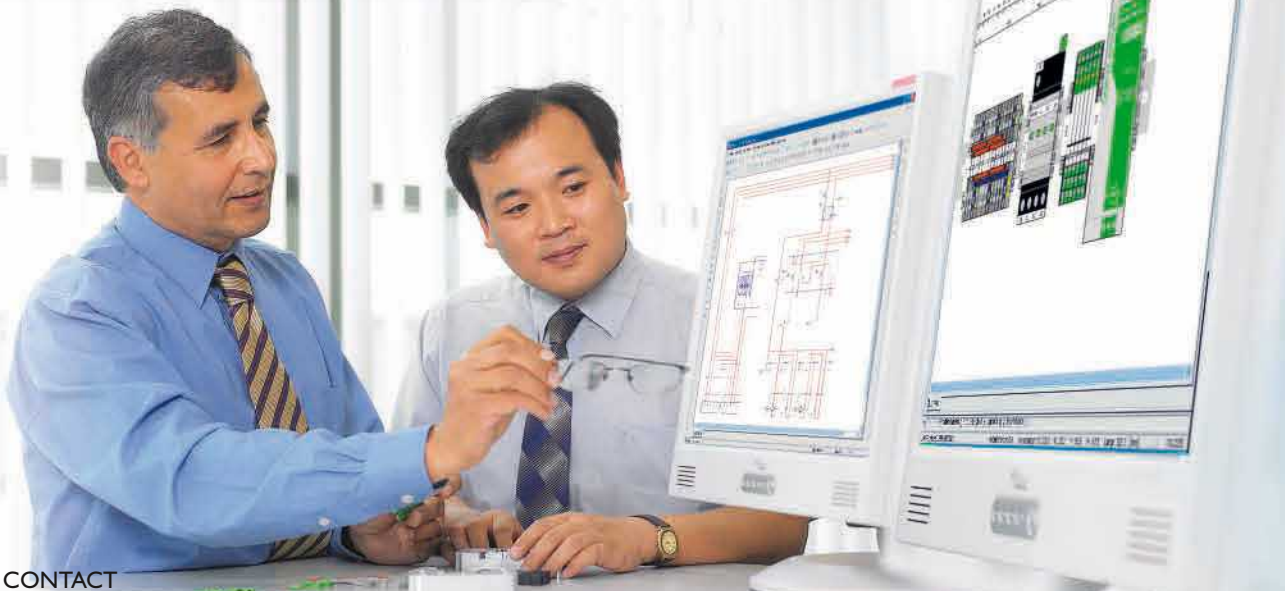

You decide the process – we help you in the implementation

CLIP PROJECT advanced combines the proven planning software to project the terminal strips with an efficient marking tool.

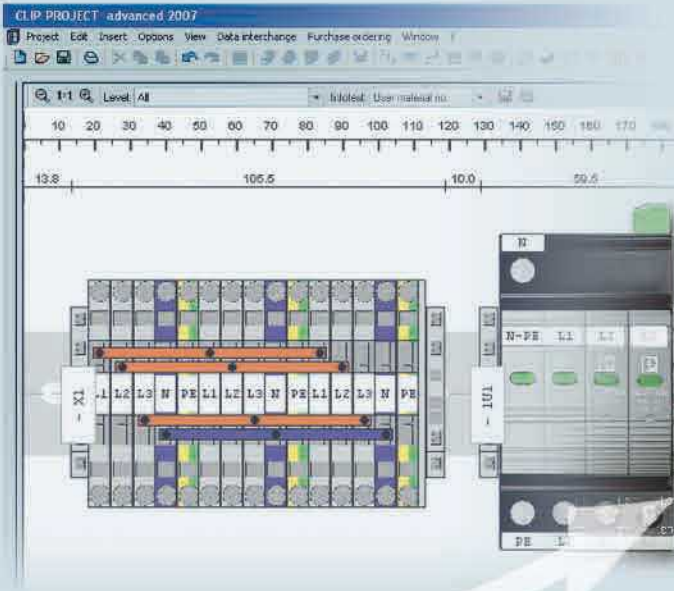

The direct data exchange with all conventional CAE programs as well as the establishment of the complete project documentation make this project planning software unique. Output devices and marking materials for terminal, conductor and equipment marking are ideally supported.

1. Project planning

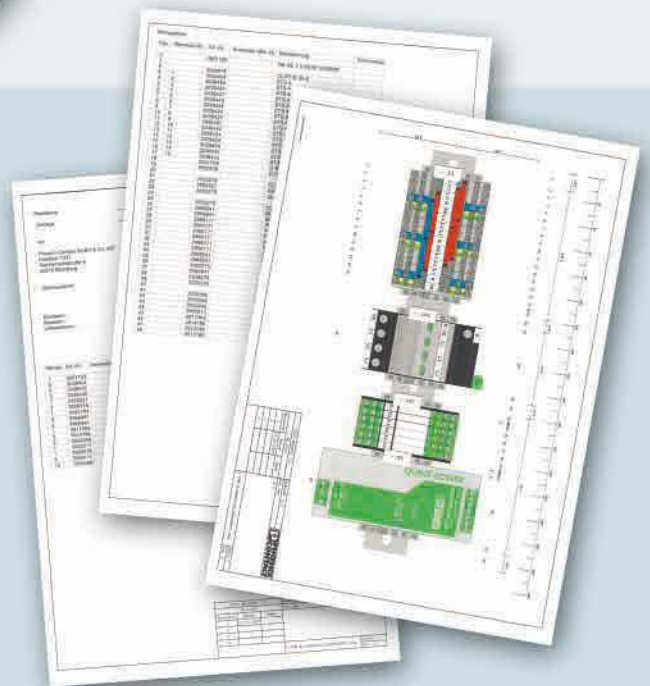

CLIP PROJECT advanced automatically takes on the marking information of your circuit diagram with the project information. They can be transferred directly to the output devices for printing of the terminal, conductor and equipment marking; for the construction of precise, completely marked applications.

2. Production

CLIP PROJECT advanced simply produces complete order, piece, design and assembly lists as well as a two-dimensional drawing of the terminal strips in a mouse click.

This documentation, of course, also contains all of the accessories that have been inserted by the automatic correction function.

CLIP PROJECT advanced makes all documents available for a trouble-free manufacture of your terminal strips.

With the automatic correction function, you can be sure that nothing was forgotten when ordering the single parts.

The two-dimensional illustration of the terminal strips simplifies the construction.

3. Assembly

It makes no difference if you pre-assemble the terminal strips or combine the components in the control cabinet, with CLIP PROJECT advanced, a thorough documentation is available for you for the assembly and testing of your application.

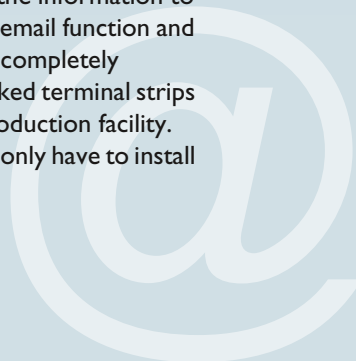

We assemble your terminal strips – a service by PHOENIX CONTACT

2. Assembly

We manufacture terminal strips according to your request. With CLIP PROJECT advanced you design the strips according to your concept. Just send the information to us with the built-in email function and we will deliver the completely assembled and marked terminal strips directly to your production facility. Fast and easy – you only have to install the strips.

Always up-to-date, always available to you. Here you'll find everything on our products, solutions and service:

Product range

- Cables and wires
- Connectors
- Controllers
- Electronics housing
- Electronic switchgear and motor control
- Fieldbus components and systems
- Functional safety
- HMIs and industrial PCs
- I/O systems
- Industrial communication technology
- Industrial Ethernet
- Installation and mounting material
- Lighting and signaling
- Marking and labeling
- Measurement and control technology
- Modular terminal blocks
- Monitoring
- PCB Terminal Blocks and PCB connectors
- Power supply units and UPS
- Protective devices
- Relay modules
- Sensor/actuator cabling
- Software
- Surge protection and interference filters
- System cabling for controllers
- Tools
- Wireless data communication
