

# Safe Operation

Order No. 2868489

One-day seminar  
Safe operation of machinery

## 1 Description

This seminar will provide you with a comprehensive overview of the essential requirements regarding the safe operation of machinery based on the German Ordinance on Industrial Safety and Health. Conversion measures for machinery and the interlinking of machinery will also be covered. Under certain conditions, an operator can become the machine manufacturer and must therefore satisfy the requirements that are placed on a manufacturer. The criteria for assessing the relevant aspects of this will be presented. You will be provided with information on how you may be able to avoid taking on the manufacturer role and the associated obligations.

## 2 Program

- Presentation of international and national ordinances and laws and the correlations between them
- Employer obligations involving machinery
- Communication of the required methods and processes for the safe operation of machinery
- Comparison of the old and new German Ordinance on Industrial Safety and Health
- Explanation of the terms used
- Aspects of significant changes to machinery and the required documentation according to the current BMAS interpretation paper
- Consequences of interlinking resulting in an assembly of machinery
- Consequences of a change constituting a significant change
- Requirements and measures when an operator becomes the manufacturer

## 3 Target groups

- Company managers
- Technical managers, maintenance managers/planners
- Specialists for occupational safety, safety officers

#### **4 Duration and costs**

1 day

We will be happy to prepare a non-binding quote for you.

To request this, speak to your personal sales partner directly or contact the headquarters in your country.

#### **5 Requirements**

None

#### **6 Further information**
