## **Compact PCB connectors with a 2.54 mm pitch**

(06/18) Phoenix Contact has extended its range of compact PCB connectors, now with a pitch of 2.54 mm. The single and double-row MCC 0,5 and DMCC 0,5 connectors are suitable for conductor cross sections from 0.14 mm<sup>2</sup> to 0.75 mm<sup>2</sup>.

The 2-pos. to 16-pos. connectors are designed for currents up to 6 A and voltages up to 160 V. Corresponding crimp contacts with a gold-plated surface are available as bulk or taped products, and enable manual or automated processing of small and large numbers of positions. The PCB connectors are connection-compatible with the FMC 0,5 and DFMC 0,5 series with Push-in spring connection, enabling the user to choose freely between crimp or Push-in spring connection, depending on the application.
