Primary-switched power supply unit QUINT POWER, Screw connection, DIN rail mounting, input: 3-phase, output: 24 V DC / 20 A, adjustable from 24 V DC ... 29.5 V DC

## Product description

The fourth generation of the high-performance QUINT POWER power supplies ensures superior system availability by means of new functions. Use in all industrial networks with integrated IO-Link interface and direct connection to the QUINT UPS or the CAPAROC circuit breaker system with system integration.

The unique SFB technology and preventive function monitoring of the QUINT POWER power supply increase the availability of your application.

## Your advantages

- Most powerful output side: easy system expansion, reliable heavy load startup and miniature circuit breaker tripping
- Most robust input side: high noise immunity, thanks to integrated gas-filled surge arrester (up to 6 kV) and  $\geq 20$  ms mains failure buffer time
- Most comprehensive signaling: preventive function monitoring reports critical operating states before errors occur
- Communicative: Use in all industrial networks with integrated IO-Link interface and direct connection to the QUINT UPS or the CAPAROC circuit breaker system with the system integration

#### Criteria

|             |  |
|-------------|--|
| Criterion A | Normal operating behavior within the specified limits.   |
| Criterion B | Temporary impairment to operational behavior that is corrected by the device itself.   |
| Criterion C | Temporary adverse effects on the operating behavior, which the device corrects automatically or which can be restored by actuating the operating elements. |
