PoE injector, 30 W, RJ45 jack on Push-in terminal blocks, 10/100/1000 Mbps, DIN rail mounting, IP20, electrical isolation, shield contacting with strain relief, shield current monitoring, surge protection. Product is being prepared for compliance with the Cyber Resilience Act (CRA).

Product description

The midspan injectors connect Ethernet devices without PoE (e.g., switches) to PoE-capable end devices (e.g., IP cameras). As power sourcing equipment (PSE), the injector supplies the required power to a powered device (PD) via the data cable. The injector and end device negotiate the electrical power requirements autonomously.

Your advantages

- Extended temperature range of -40 °C ... +75 °C
- Fast connection of the PoE cable
- Wiring space covered with front panel cover
- Integrated surge protection to ensure high system availability
- Electrical isolation of the internal power supply unit for protection against short circuits on the PoE side
- 10/100/1000 Mbps
