Emergency stop switch in IP65 housing, in conjunction with appropriate evaluation unit suitable for use up to PL e (EN ISO 13849-1), SIL 3 (EN IEC 62061), surface installation, 5-pos. M12 connection

## Product description

Phoenix Contact emergency stop switches are electromechanical switching devices with a safety function. They are used to safely shut down or stop machines and systems in order to prevent or minimize personal injury and property damage. The portfolio includes a modular system as well as a preconfigured solution. The preconfigured emergency stop switch is ready for immediate use and is connected via a 5-position M12 male connector. Thanks to the robust design, the emergency stop switches can be used flexibly and can be integrated directly into the machine.

## Your advantages

- IP65 degree of protection allows mounting directly in the machine
- Reduction of wiring errors with uniform 5-position M12 connection
- Rapid on-site diagnostics with color-coded switching position indicator
- In applications with appropriate evaluation device suitable for use up to PL e (EN ISO 13849-1), SIL 3 (EN IEC 62061)
