The Eduline PLCnext Starterkit textbook bundle combines an entry-level training board with accompanying educational material (textbook) in German and a Factory I/O simulation file.

Product description

Our Starterkit bundle is the perfect combination of hardware with educational material: The textbook includes practical and theoretical exercises with solutions for different levels of learning, project examples from higher education and industry. After reading the textbook, the teacher will be able to implement the PLCnext Technology directly in the lesson and incorporate it into the syllabus. The simulation project file that is also included in the bundle refers to the Factory I/O simulation software that is widely used by many international higher education institutions and vocational colleges. The textbook contains detailed instructions for accessing virtual 3D industrial plants and systems using PLCnext Technology, without requiring special Phoenix Contact drivers to use the software. Customers who have purchased the PLCnext Qualification Starterkit can download a project example for a simulated sorting plant. The download code is printed in the textbook.

Your advantages

- Wide range of possible applications from teaching classic automation through to computer science lessons with examples of tasks from various specialist fields
- Full access to the PLCnext ecosystem, incl. free engineering software and therefore entry into the world of PLCnext
- Intelligent networking capability, thanks to cloud connection and the integration of current and future communication standards

Commercial data

Item number	1367512
Packing unit	1 pc
Minimum order quantity	1 pc
Product key	XP1AHA
GTIN	4063151721572
Weight per piece (excluding packing)	2,300 g
Country of origin	Information on the country of origin is provided with the delivery.
