Technical data

Notes

Notes on connection	Compatibility advantage: Thanks to the technical implementation of the push-pull dual-contour design, the distributor box can be connected using standard screw-type connectors (M12) and push-pull connectors.
Assembly note	NOTE: Observe the permissible bending radii when routing cables, since the degree of protection may be at risk if the bending forces are too high. Reduce mechanical loads upstream of the connector, e.g., by using cable ties.
Note on application	Unused slots are to be sealed off prior to commissioning. Suitable sealing elements are to be found under "Accessories".
