Product description

Vehicle charging inlet for charging with direct current (DC), compatible with type 2 CCS vehicle charging connectors (EVSE), for installation in electric vehicles (EV).

Your advantages

- Space savings of over 50% in terms of the installation depth compared to our CCS charging inlets with straight cable outlet
- Uniform, space-saving dimensions for the installation space and the screw connection points of all Phoenix Contact vehicle charging inlets
- More convenient and clearer installation of the cable harness
- Temperature hotspots avoided due to the larger bending radius
- Easy to make the switch, as all CCS charging inlets have the same screw-connection geometries
- IP6K6K/IP6K9K protection on the front withstands high-pressure and steam jet cleaning
- Developed and produced in accordance with the IATF 16949 automotive standard and ISO 9001
