Bus-bar current transformer, 150 A AC primary current; 5 A AC secondary current; accuracy class 1; 5 VA rated power

Product description

Our PACT current transformers for new installations offer a complete portfolio for converting alternating currents up to 4000 A AC. PACT current transformers are available as bus-bar, window-type, and winding current transformers with a range of different transformation ratios, accuracy classes, and rated powers suitable for your current measurement tasks.

Your advantages

- Protection against destruction: short-circuiting of the transformer by rotating the terminal cover 90°
- Variable mounting with flexible mounting options
- Detect peak loads reliably with a thermal nominal continuous current that is 120% of the primary rated current
- Increased electrical safety with high rated insulation voltages
- Space-saving design with consistently narrow housing widths of 30 mm
