LED machine light

Product description

The LED light is designed to provide illumination inside or on machinery. M12 sensor/actuator cables enable multiple lights to be connected one after the other and to be switched on and off via the light interface, dimmed continuously, and operated in flash mode. In addition, the integrated high-quality optics prevent glare for the machine operator.

Your advantages

- Protection against polarity reversal, excessively high supply voltage, and overtemperature
- Two PWM inputs for dimming and flash mode
- Error indication via digital output
- Laminated safety glass enables use even in environments with potential mechanical strain
- Particularly economical thanks to energy-efficient LED technology and an LED service life of at least 50000 h
- Can be switched in series via sensor/actuator cables with SPEEDCON M12 rapid interlock system
- Homogenous and glare-free lighting thanks to innovative optics
- Focused illumination, thanks to 50° emission angle

Commercial data

Item number	2701689
Packing unit	1 pc
Note	Made to order (non-returnable)
Sales key	DR08
Product key	DRL223
GTIN	4046356783316
Weight per piece (including packing)	735.7 g
Weight per piece (excluding packing)	735.7 g
Customs tariff number	94054099
Country of origin	DE
