The figure shows the standard item

Inline, Strain gauge measurement terminal, transmission speed in the local bus: 500 kbps, 2 precise and fast inputs, 4-, 6-conductor connection technology, degree of protection: IP20, including Inline connectors and marking fields

Product description

The terminal is designed for use within an Inline station. This terminal is a precise and fast input module. It is designed to connect load cells, force transducers, mass pressure transducers, and similar devices. The terminal is based on strain gauges. You can connect the strain gauges using 6- or 4-conductor technology. The measured value can be output directly on a weight display via a serial interface. There are two options for data exchange: - via process data - via PCP Compact (both inputs in the "Analog Values" PCP object) The measured values are represented by standardized 16-bit values.

Your advantages

- 2 high-precision inputs for strain gauges
- Measuring ranges adjusted with nominal characteristic values upon delivery
- Manual entry of characteristic values
- Process data update can be parameterized in increments between 200 μ s and 100 ms
- Path adjustment in the process environment
- 2-point adjustment
- Connection of strain gauges in 6- and 4-conductor technology
- Advanced wire-break detection
- Sensor supply of up to 115 mA (8 load cells with 350 Ω per channel)
- Per channel: low-resistance, floating N/O contact
- The channels are parameterized independently of one another via the bus system
- Tara device
- Serial interface for external weight displays
- Status message when zero point is reached and resting of measured value
