INTERBUS-ST counter module, 4 counter inputs, 24 V or 5 V DC signal level, IP20 protection, consisting of: Terminal part with screw connection and module electronics

Product description

INTERBUS ST counter module

The IB ST 24 CNT module is designed for counting pulses, measuring frequencies and periods, and generating square-wave pulses.

The module has 4 channels which can be operated independently of one another. The counter then has a 16-bit resolution. Cascading is possible by simply connecting several counters in a row.

Each channel has a digital output that can be set according to the event. Simple applications can use a single device.

The module is available with either screw or spring-cage connection.

Your advantages

- Connection of actuators in 2-conductor technology
- Connection of sensors in 2- or 3-conductor technology
- Short-circuit and overload-protected outputs
