CRA-READY

Inline measurement terminal block for absolute encoders, complete with accessories (connector and labeling field), 1 input for absolute rotation or position measurement systems, with SSI interface

Product description

The terminal is designed for use within an Inline station. The terminal block is used to acquire the data from absolute encoders with SSI interface up to 25 bits (single-turn, multi-turn, or length measuring systems). It supports encoders with gray and binary codes and thereby also converts gray code into binary code.

Your advantages

- 1 single or multiturn encoder with up to 25 bit resolution can be connected
- Transmission frequency up to 1 MHz
- Shield connection
- 5 V encoder supply including monitoring
- Parity monitoring
- Rotation can be reversed
- Gray or binary code
