Rail-mountable Ethernet hub with 16 RJ45 ports, supports Ethernet with 10 Mbps as well as 100 Mbps

Product description

Ethernet hub with 16 RJ45 ports. The hub enables quick and cost-effective Ethernet network extension. It has sixteen twisted pair ports, which you can use to connect additional network segments or termination devices. The FL HUB 16 TX-ZF supports both Ethernet with 10 Mbps and with 100 Mbps. The hub regenerates the received data telegrams and sends them to the remaining ports. For port 5, a port assignment switch is located on the hub. The transmit and receive cables are exchanged at port 5 by actuating the switch, while polarity is maintained.

Your advantages

- Outcross port
- 10/100 Mbps, can be selected
- High port density
