Inline power terminal block, complete with accessories (connector and labeling field), 24 V DC, with fuse (Main and segment voltage) and diagnostics

The figure shows the version IB IL 24 PWR IN-PAC

Product description

The terminal is designed for use within an Inline station. It provides a 24 V supply voltage to the main circuit (U_M) and automatically supplies power for the 24 V segment circuit (U_S). The terminal has protection against polarity reversal and surge voltage. The internal fuse protects the main and segment circuits. This terminal has an LED for bus diagnostics. It occupies two input data bits, which indicate the availability of the supply voltage and the status of the fuse.

Your advantages

- Supply of the 24 V main voltage U_{M}
- Provision of the 24 V segment voltage U_{S}
- Main and segment circuits protected by an internal fuse
