Primary-switched power supply, QUINT POWER, screw connection, DIN rail mounting, supply of devices possible via the TBUS DIN rail connector, protective coating, input: single-phase, output: 24 V DC/2.5 A

Product description

The QUINT POWER power supply has been specially developed for supplying power to compatible Phoenix Contact products via the T-bus DIN rail connector. Furthermore, it can be directly latched onto the DIN rail. The device features a protective coating and has IECEx, ATEX, and HazLoc approvals. The OVP (overvoltage protection) of <30 V DC protects your system against voltage increases. In the event of an error, the output is switched off to protect the loads against overvoltages. The output circuit is decoupled by a MOSFET.

Your advantages

- Also for operation in potentially explosive areas (zone 2)
- Optionally for supplying devices via the TBUS DIN rail connector
- Preventive function monitoring indicates critical operating states before errors occur
- Starting of heavy loads with dynamic boost
- High efficiency and long service life, with low power dissipation and low heating
