Ex ic repeater power supply and input signal conditioner, HART for VIP I/O-Marshalling base elements: Transmits 0/4 ... 20 mA signals from the potentially explosive area (zone 2, CID2) to a load (active or passive) in the safe area. 3-way electrical isolation

Product description

Ex ic repeater power supply and input signal conditioner, HART: Transmits supplied or active 0/4 … ⎿⎾⇂ mA signals from the Ex area to a load (active or passive) in the safe area. HART signals are transmitted bidirectionally. The output can be operated either actively or passively via DIP switches. The module is installed on a corresponding VIP I/O-Marshalling base element by means of plug-in contact. Installation in zone 2, “ec” type of protection is permitted.

Your advantages

- Two-stage progressive release allowing for voltage checks with field-powered devices
- Channel for marking accessories
- Integrated keying reduces possible user error during replacement
- Signal disconnect with test points
- Bidirectional HART signal transmission
- 3-way electrical isolation
